limits of a sequence

How do find the limits? Sequences are really just functions of the integers n ...

Theorem

If $\lim_{x \rightarrow \infty} f(x) = L$ and $f(n) = a_n$, where n is an integer, then $\lim_{n \rightarrow \infty} a(n) = L$.

exercise 3

Determine if the following two sequences converge or diverge:

$$(a) \quad \left\{ \frac{2^n - 1}{2^n} \right\}_{n=1}^{\infty}$$

$$(b) \quad \left\{ \frac{2n^3 - 1}{n^3} \right\}_{n=1}^{\infty}$$
