<u>Theorem</u>

For all integers m and n, if m and n are odd, then m+n is even.

Visual intuition

$$2k+1$$

$$2r+1$$

$$(2k+1) + (2r+1) = 2(k+r+1)$$

 $m + n = 2(s)$

• an integer n is called **even** if there is an integer k where n=2k

the principle of mathematical induction

everybody do the wave!
